

# What Is New In Technology?

Technology is ever advancing and changing.

Here is a list of new and trending technologies in 2021:

## AI & Machine Learning

Although it is not new, but AI & ML are now being deployed in a large number of sectors including resource utilization, customer service, content creation, etc.

## Robotic Process Automation

RPA is being employed in business activities including customer service, invoice processing, employee onboarding, analytics, etc.

## Edge Computing

Edge computing has advanced uses such as autonomous vehicles, smart grid, remote monitoring of assets, predictive maintenance, patient monitoring, virtualized radio networks, etc.

## Quantum Computing

It has diverse applications in cyber security, drug development, financial modeling, traffic optimization, solar capture, etc.
